

Ahrianna Daniels

SUMMARY

QA Analyst with 4+ years of experience validating e-commerce and internal platforms in fast-paced environments. Experienced in manual, regression, and Playwright-based test automation using JavaScript. Known for collaborating closely with engineers and product teams to improve release quality.

EXPERIENCE

QA Engineer

FBB Brands

October 2021 – December 2025

- Performed manual **functional** and **regression testing** across **4+ releases per month** on web and mobile platforms.
- Tested responsive web applications across desktop and mobile viewports.
- Identified, documented, and tracked **14+ defects in JIRA daily**, collaborating with Product to prioritize high-impact issues and reduce production bugs.
- Designed and maintained Playwright-based E2E automation with a focus on stability, reusability, and regression coverage.
- Developed and executed test plans & cases based on product requirements and release scope.
- Conducted post-release smoke testing to ensure successful and stable deployments.
- Validated accessibility considerations including keyboard navigation, semantic HTML, and basic WCAG compliance.
- Participated early in requirements discussions to identify test risks and improve quality outcomes.
- Refined test data preparation processes for automated and manual suites, ensuring comprehensive scenario coverage and minimizing redundancies across cross-browser testing cycles.
- **Reduced regression testing time by 2 hours per release** by creating an Excel-based validation tool to streamline order verification and cross-referencing with automation team data.

Asst. Mgr of E-Comm

FBB Brands.

January 2019 – October 2021

- Oversaw Jira boards to coordinate and track site-related development tasks.
- Managed product and category setup using Salesforce Commerce Cloud.
- Identified and corrected inconsistencies in monthly operating reports (MOR) by validating Adobe Analytics data and building Excel models to automate and ensure accurate product and category calculations.

Web Developer

FBB Brands

March 2018 – January 2019

- Built and deployed 20+ web pages and emails with HTML, CSS, and JavaScript under tight weekly deadlines.
 - Developed email campaigns and coordinated brand alignment with the E-Commerce team.
 - Consistently delivered high volumes of web pages and email campaigns under tight deadlines, often completing a full week's workload in a single day and supporting other developers with overflow tasks.
-

SKILLS

Testing: Manual • Regression • Functional • User Acceptance Testing(UAT) • Analytics Validation •

Core Technologies: Playwright • Git • Developer Tools • Python • JavaScript • HTML • CSS • React • Next.js • SQL

Methodologies: Agile/Scrum • CI/CD

Tools and Platforms: Postman • TestRail • Jira • Salesforce • VSCode • Microsoft Excel • Adobe Analytics • Vercel

EDUCATION

Bachelor's Degree

DeVry University
